Zap Zits

June 25, 2009

Proactiv Solution gets enough publicity with their infomercial-type celebrity endorsements and testimonials; but the thing is, it **really** works. This three-step system (\$19.95) is **wondrous** for your skin when used properly. The kit includes the renewing cleanser, revitalizing toner, and repairing lotion. No doubt, their secret weapon lies in the soothing toner. Unlike most, this one doesn't contain alcohol, and won't strip your skin of the natural oils you do need; it uses botanical elements to balance your **skin**. Best of all it takes less than five minutes to use and the results are long lasting. To learn more about Proactiv's line of products and other special deals on acne products visit www.proactiv.com.

Liz says:

Proactiv did not work for me either. It actually seemed to cause pimples instead of preventing them. I decided to try Proactiv because of small bumps/pimples I had on my forehead. It did clear up the bumps but I also kept getting big pimples on my face quite frequently (I did not previously have this issue). I used the product for about a year and after a month of no longer using the product, my face has cleared. I would suggest trying the product first and seeing if it works for you.

Nancy says:

Proactiv did not work for me! It may help prevent new pimples from appearing, but it does not get rid of the acne that you have.
